

Experiment 10

AIM: Develop a Laravel/Django based web application

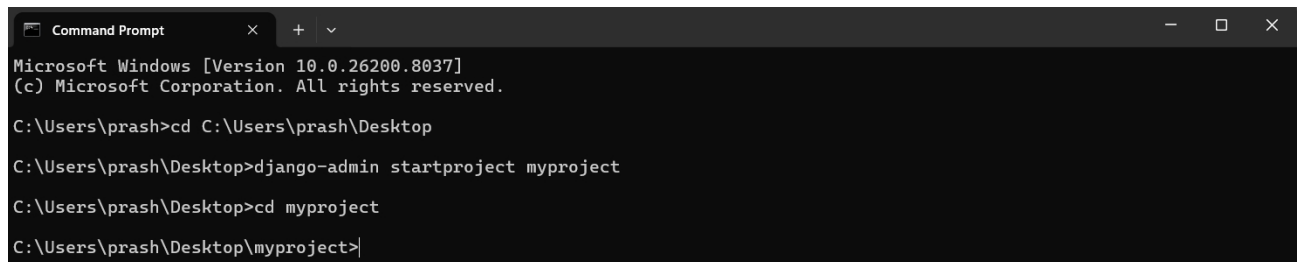

1. Open VS Code -> Terminal -> New Terminal

- 2.

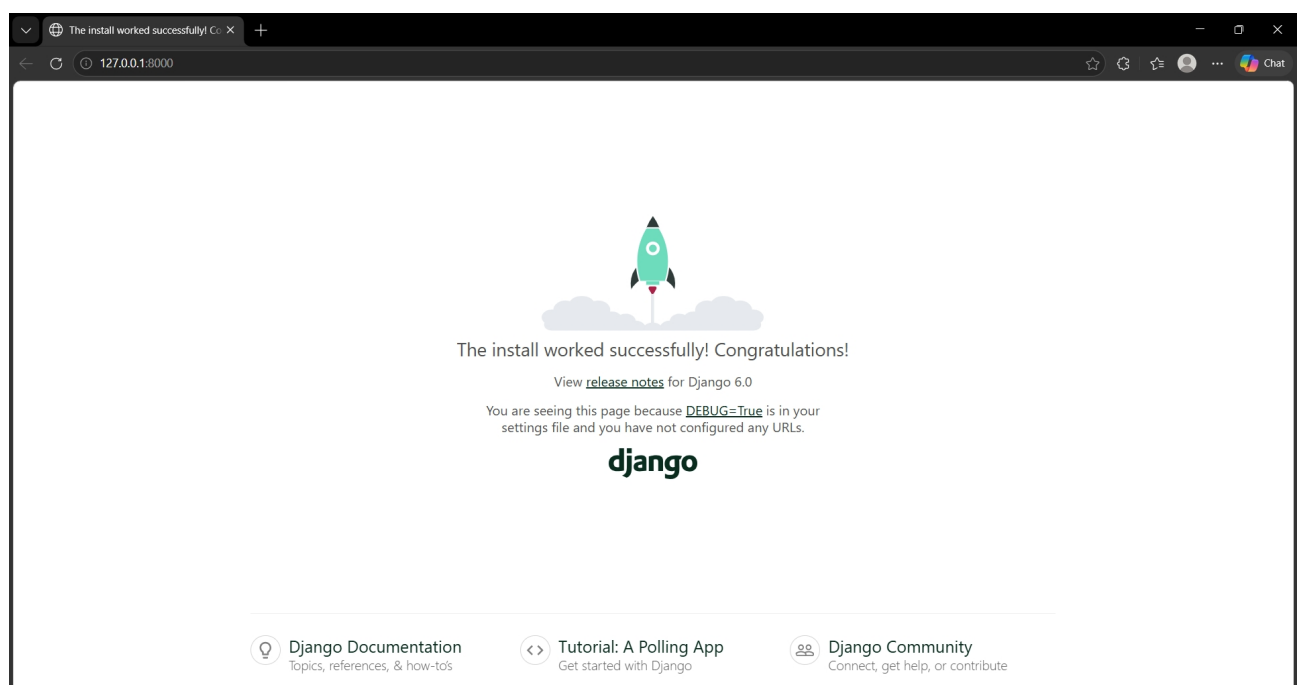

3. Create New Project

```
python -m django startproject myproject or django-admin startproject  
myproject  
cd myproject  
pip install Django
```

4. Run Server (First Test)

```
python manage.py runserver  
Open browser:  
http://127.0.0.1:8000/
```

5. Create Simple App
python manage.py startapp myapp
6. Register App
Open: myproject/settings.py and include the below code
INSTALLED_APPS = [
 'django.contrib.admin',
 'django.contrib.auth',
 'django.contrib.contenttypes',
 'django.contrib.sessions',
 'django.contrib.messages',
 'django.contrib.staticfiles',
 'myapp', # your app
]
7. Create Simple View
Open: myapp/views.py and include below code
from django.http import HttpResponse
def home(request):
 return HttpResponse("Hello from VS Code Django!")
8. Create URL File
Create file: myapp/urls.py and include below code
from django.urls import path

from . import views
urlpatterns =
[path("",
 views.home),

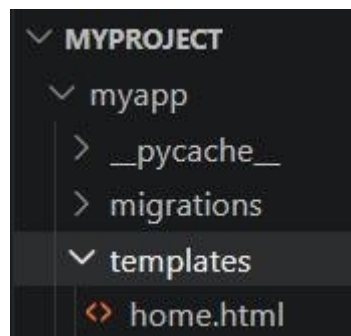

]
]
9. Connect URLs
Open: myproject/urls.py include below code
from django.contrib import admin
from django.urls import path, include
urlpatterns = [
 path("", include('myapp.urls')),
 path('admin/', admin.site.urls),
]
]
10. Run
python manage.py runserver
Open:
http://127.0.0.1:8000/
Output:

To add GUI:

1. Create Template Folder

Inside myapp, create:

2. Add the below GUI Code

<!DOCTYPE html>

<html>

<head>

<title>Django GUI Demo</title>

</head>

<body style="font-family: Arial; text-align: center;">

<h1 style="color: blue;">Welcome to Django GUI</h1>

<p>This is a simple interface created using HTML</p>

<button onclick="alert('Hello!!!!')">

Click Me

</button>

</body>

</html>

3. Update views.py

Open: myapp/views.py and include below code
from django.shortcuts import render

```
def home(request):  
    return render(request, 'home.html')
```

4. Run Server

python manage.py runserver
